

## KARSH KALE BROKEN ENGLISH

### LYRICS

#### **MANIFEST** (Maddox/Vaid)

I have a dream to sit side by side  
With young guns that blast to cease the genocide  
From the beginning we ride, cause we're told to  
The journey got strange though, when we rolled through  
Changes I'm writing and switching sides fighting  
From those that's got might  
To those who are right within  
And more mighty is my ballpoint than an M16  
But if I have to, I'm gonna blast to manifest my dream

Rooh me Bharde Aagni (Fill my soul with fire)  
Bole Tanha Kaagni (Cries out the lonely black crow)

Tomahawk chops need to come back  
I wish the Cherokee ride  
To paint the white house red and black  
Matter fact jack, the mad hatter  
Restore the trade post, mainland to Staten  
Broadcast what happened when the unkind came  
Replay the foulplay, interrupt the ballgame  
Free the land in the name of all  
That catch the consequence when systems fall

When night falls, the right calls to me  
I fight brawls, for my fam to free  
And light flames for lost troops to see  
We feel pain, for my fam to free

When the story goes down  
On the manuscript  
It's well documented  
Every man can slip  
But will you rise up, when you fall down  
Will you rep right for the get down  
Or just choose teams, for the cash crop  
Till we all burn, and the ash drop  
I wanna shake the can, and pop the top  
And spray cans in scopes till sniping stops...

### **DANCING AT SUNSET** (Michaelson)

Electricity is surging through my body

The cities lighting up the atmosphere  
The sun is falling and the moon appears  
The ground is shaking so I know we're near  
To the center of the earth  
To the center of the soundwaves  
We have no reason in the world to fear  
If everyone can feel this everywhere  
The ground is shaking so I know we're near  
To the center of the earth  
To the center of the soundwaves

A silhouette of a woman dancing at sunset  
I'm forever in awe natural beauty  
A silhouette of a woman dancing at sunset  
Her sacred curves moving in perfect symmetry

People want to be free  
Free to decide  
Free to follow the wind  
To see what they may find

Here we are  
Bathed in light  
Soaked in sound  
Sacred time  
Here we are

Akhian mila, sajnaa (meet my gaze, my love)

### **BEAUTIFUL** (Sophie Michalitsianos)

Remember how she looked at me  
And smiled when I didn't know her before  
And all day long that kept me warm  
Your love is beautiful  
Like a bird

Kari Rath a mora Gia Gabarave

Come to me

You know you'll be waiting for a long long time  
Missing all the pretty things that pass you by  
I'm telling you the way back home  
Out of the Dark Age is to love your own  
If you sit down on the metal track  
And hope your train will hurry back  
You know you'll be waiting for a long long time  
Missing all the pretty things that pass you by

### **NEW BORN STAR** (Naidu)

Floating, expanding, new born star

### **FREE FALL** (Reiss, Kale, Merchant)

Saajan More Ghar Ayo re Ayo (my lover has come home)

Been around town looking for you to save me  
But the way that we're living makes it so damn crazy  
That I can't help thinking how we're gonna make it  
When the scene that we're filming won't make the final take  
But I know it's late to put on the breaks  
So don't make me wait, don't make me wait  
I know its late to put on the brakes  
So don't make me wait cause baby it's a full moon

Can you feel me  
When you're away  
You're the one that  
Makes me insane

Let it be, let it be dirty now  
Let it be, let it be  
Let me be, let me be with you now  
I don't care that we're not supposed to

Coming over, common over

### **INNOCENCE AND POWER** (Dubois, Vaid)

Our father he  
Sent us all away  
Under the moonless hour  
He gave us blue lit shadows in the rain  
And foolish games of cowards  
Under the moonless hour

Soft as we come  
We have found a way  
Of innocence and power

Sent us all away  
To shadows in the rain  
But we have found a way  
That we can feel sane

Gham he Ya khushi he tu (are you my grief or are you my joy)  
Meri zindagi he tu (you are my life)  
Meri raat ka chiraag (you are the light of night)

If you wanna talk about it  
If you're gonna fall apart  
If you wanna call out  
Anyone can fall apart  
Talk to me

### **HOLE IN THE SKY** (Michaelson)

If there was ever a time for an angel it's now  
Come down through the holes in the sky tonight

Vacuum of space  
In a vacuum of your embrace

### **SOME THINGS ARE OK** (Vaid)

Sundar ho ik man ka mandir (so beautiful is the temple inside my mind)  
baithe ho piya jiske andar (within which my lover resides)  
dur thei jese saath samandar (we were as far away as the seven seas)  
aaj hue hain ek hi antar (and now we have become one meaning)

humre man ko bhaye (and this brings me joy)

man me more piya aaye (my love comes to mind)  
jese aankh me kaajal bhaye (like mascara to the eye)

### **LOUDER THAN BOMBS** (Michaelson, Vaid)

I ask myself  
When the sun begins to bleed  
And the bombs begin to rain  
I ask myself  
Just who is the enemy  
Who is the enemy

A father, a soldier  
Is leaving his family  
His baby, his lover, his mother are crying  
His father, his sister are praying return to me  
We all thought that war was his-story, how can this be

I ask myself  
When the sun begins to bleed  
And the bombs begin to rain  
I ask myself  
Just who is the enemy  
Whoever I am payed to hate

And only the truly brave  
And only the truly free  
Are waiting for the day  
When we live in unity  
And then we realize when the day is finally reached  
The power and beauty to be living in peace

Skin may change but the soul is the same  
Waiting for the day we see ourselves the same

Naked soul  
Down to the bone  
Same red blood  
Same marrow  
Same marrow  
Same marrow

**CITY LIGHTS** (Kale, Michaelson)

All the colors of your voice  
Float around me as I pray  
I'm surrounded by your sounds  
If it ever falls apart  
I will never be the same

Beautiful streetlights  
Might light the way back  
But I don't know if I can stay  
And lay my head down

The sacrificing wind  
Moving by an unseen hand  
Taking us all back  
Back to where it all began  
To the places never find  
Where memory resides  
Do you live inside your mind, live inside your mind

Beautiful streetlights  
Might light the way back  
But I don't know if I can stay  
And lay my head down  
Cause the city lights are in my eyes  
I'm sitting in the light tonight

I don't know if I could stay  
If I could stay

**RISE UP** (Siddiqui)

Rise up, Rise up
